## FEDERAL COMMUNICATIONS COMMISSION SETS NEW DATE FOR COLLOQUIUM ON PUBLIC SAFETY AND HOMELAND SECURITY PORTION OF THE NATIONAL BROADBAND PLAN FOR MARCH 31<sup>ST</sup>

Washington, D.C. – The Federal Communications Commission's (FCC's) Public Safety and Homeland Security Bureau (Bureau) today set **a new date for a colloquium** to discuss the public safety and homeland security portion of the National broadband Plan (Plan). The new date and time for the event will be **Wednesday, March 31, 2010 from 9:30 a.m.-11:30 a.m**. The event, which will be held in the Commission Meeting Room (TW-C305), was originally scheduled for March 26<sup>th</sup> at 9:00 a.m. and has been pushed back to the new date and time due to necessary scheduling changes.

As part of the colloquium, representatives from the Public Safety and Homeland Security Bureau will make presentations discussing how the Plan addresses the following issues:

- Deployment of a nationwide interoperable public safety wireless broadband network;
- Innovation in the development and deployment of Next Generation 911 networks and emergency alerting systems; and
- Cyber security and critical infrastructure survivability.

The goal of the Public Safety and Homeland Security portion of the Plan is to enable and enhance the use of broadband technologies by first responders in sending and receiving content-rich data, resulting in saved lives; diminished injuries; improved emergency care and response; and more effective prevention of acts of crime, terror and hatred. Such technologies will also guard critical infrastructure, and enable interoperable response to emergencies in coordination with other first responders located throughout the nation. Broadband technologies will ensure that all Americans are able to reach and access 9-1-1 services quickly, reliably, and that the public has the ability to send and receive critical information regardless of the mode or device used. These technologies and innovations will also advance the modes and methods by which the public receives accurate, concise, and timely alerts and warnings. The Public Safety and Homeland Security portion of the Plan will also enhance the security and resiliency of broadband infrastructure, including measures to prevent and assist in the response to cyber attacks.

The colloquium will be open to the public; admittance, however, will be limited to the seating available. Those individuals who are interested in attending this event may pre-register on-line at <a href="http://www.fcc.gov/pshs/event-registration.html">http://www.fcc.gov/pshs/event-registration.html</a>. Those who pre-register will be asked to provide their name, title, organization affiliation, and contact information. Individuals may also contact Deandrea

Wilson at <u>Deandrea.Wilson@fcc.gov</u> or via phone at 202-418-0703 regarding pre-registration. The deadline for pre-registration is Monday, March 29, 2010.

Audio/Video coverage of the meeting will be broadcast live with open captioning over the Internet from the FCC's web page at <a href="https://www.reboot.fcc.gov">www.reboot.fcc.gov</a> (go to "Events"). The FCC's web cast is free to the public and does not require pre-registration.

Reasonable accommodations for persons with disabilities are available upon request. Please include a description of the accommodation you will need. Individuals making such requests must include their contact information should FCC staff need to contact them for more information. Requests should be made as early as possible. Please send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau: 202-418-0530 (voice), 202-418-0432 (TTY).

For additional information about the meeting, please contact Susan McLean at (202) 418-7868 or by email: Susan.McLean@fcc.gov.
