MAY 18 CLEAN TECHNOLOGY SHOWCASE

Washington, D.C. – The Federal Communications Commission has confirmed more than twenty technology companies to participate in the *Clean Technology Showcase* at FCC Headquarters on May 18.

Confirmed technology exhibits include home energy management systems, smart appliances, smart electric meters, smart grid communications equipment, eco-friendly mobile handsets, green IT products, datacenter energy efficiency solutions, and much more.

Promoting clean technology solutions is a key recommendation of the Federal Communications Commission's National Broadband Plan, delivered to Congress in March. The plan highlights the transformative role broadband can play in meeting our national energy and environmental goals, including energy independence, greenhouse gas emissions reductions, and clean energy generation. For more information visit <http://www.broadband.gov/issues/energy-and-the-environment.html>.

The showcase is free and the public is encouraged to attend. Pre-registration is not required. All attendees are asked to bring valid government issued photo ID and will be subject to security screening. For directions, visit <http://www.fcc.gov/portalsdir.html>.

Reasonable accommodations for people with disabilities are available upon request. Include a description of the accommodation you will need with as much detail as possible. Also include a way we can contact you if we need more information. Please provide as much advance notice as possible; last minute requests will be accepted, but may be impossible to fill. Send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (TTY).
