

4. Schools and Libraries Universal Service Support Program

Eligible schools, school districts, libraries, and consortia that include schools and libraries may receive discounts for eligible services under the schools and libraries universal service support mechanism, also known as the E-rate program. The discounts range from 20 percent to 90 percent. The level of the discount is based on the percentage of students in the school or school district that are eligible for the national school lunch program (or a federally approved alternative mechanism) and location in a rural area.

Most recently, on September 28, 2010, the FCC released an order revising the E-rate program to maximize the utilization of broadband and eliminate rules that no longer serve their intended purpose.¹ The revisions adopted by the FCC fall into three conceptual categories. First, the FCC enabled schools and libraries to better serve students, teachers, librarians, and their communities by providing more flexibility to select and make available the most cost-effective broadband and other communications services. Specifically, the FCC allowed applicants to lease fiber from the most cost-effective provider, including not-for-profit entities, so that applicants can choose the services that best meet their needs from a broad set of competitive options and in the most cost-effective manner available in the marketplace. The FCC also changed its rules to permit schools to allow community use of E-rate funded services outside of school hours and supports broadband connections to the residential portion of schools that serve students with special circumstances. Further, the FCC indexed E-rate's funding cap of \$2.25 billion annually to inflation to preserve the purchasing power of the E-rate program. As a result, the cap for funding year 2010 was increased to \$2,270,250,000.² Additionally, the FCC established a pilot program to establish best practices to support off-campus wireless connectivity for portable learning devices outside of regular school or library operating hours.

Second, the FCC simplified and streamlined the E-rate application process by removing the technology plan requirement for priority one telecommunications and Internet access services, and by facilitating the disposal and recycling of obsolete equipment supported by E-rate by authorizing schools and libraries to receive payment for such equipment. Third, the FCC improved safeguards against waste, fraud, and abuse by codifying the requirement that competitive bidding processes be fair and open and making the gift rules under the E-rate program consistent with the gift rules applicable to employees of federal agencies.

For an eligible school or library to receive discounts on eligible services under the E-rate program, the Commission's rules require that the applicant submit a request for services (FCC Form 470) to the universal service fund administrator, the Universal Service

1 *Schools and Libraries Universal Service Support Mechanism, A National Broadband Plan for our Future*, CC Docket No. 02-6, GN Docket No. 09-51, Sixth Report and Order, FCC 10-175 (rel. Sept. 28, 2010) (*Sixth Report and Order*).

2 *Id.* at 22, para. 40.

Administrative Company (USAC). The FCC Form 470 sets forth the technological needs and the services for which the applicant seeks discounts. This submission initiates the required competitive bidding process. An FCC Form 470 is required to be posted on USAC's website for at least 28 days so that providers have an opportunity to submit competing bids to perform the services.³

After the applicant has complied with the Commission's competitive bidding requirements and contracted for eligible services, it must then submit an application (FCC Form 471) to USAC to request discounts for the eligible services. USAC reviews the FCC Forms 471 that it receives and issues funding commitment decisions indicating the applicable discounts that the applicant may receive in accordance with the Commission's rules. In order to receive reimbursement the applicant either: (1) pays the non-discounted portion of the service cost to the service provider, which, in turn, seeks payment from USAC for the discounted amount (using the FCC Form 472), or (2) pays the entire bill (the pre-discounted amount) to the service provider and seeks reimbursement from USAC for the discounted amount (using the FCC Form 474). In the latter instance, USAC disburses the money to the service provider who, in turn, reimburses the applicant.

USAC acts on these requests for funding in accordance with Commission rules and decisions. If USAC denies a funding request, the applicant may either appeal directly to the Commission or appeal to USAC. If an appeal is rejected by USAC, the applicant may appeal USAC's decision to the Commission.

Frequently, the total amount of funding requested exceeds the annual funding cap. Under the Commission's rules of priority, when the application filing window closes, USAC will calculate total requests for support submitted during the application filing window. If the total amount requested exceeds the total support available in that funding year, USAC will: (1) calculate the requests for telecommunications services and Internet access for all discount categories (these services receive first priority for funding), (2) allocate the remaining funds to the requests for support for internal connections and basic maintenance of internal connections, beginning with the most disadvantaged schools and libraries (those eligible for a 90 percent discount), and (3) commit remaining funds for internal connections to the applicants at each descending discount level until there are no funds remaining (i.e. 89%, 88%, etc).

As of June 30, 2010, USAC had committed nearly \$2.44 billion and disbursed more than \$1.82 billion of funding year 2007 funds. USAC had also committed more than \$2.51 billion, and disbursed nearly \$1.66 billion of funding year 2008 funds. As of the same date, USAC had committed more than \$2.74 billion, and disbursed nearly \$855 million of funding year 2009 funds.⁴

3 The posted forms can be viewed on USAC's website at http://www.usac.org/sl/tools/search_tools/form470-search-posted.aspx (last viewed Dec. 15, 2010).

4 See Table 4.1.

USAC supplies the FCC with funding commitments and disbursements information for the E-rate program for all active funding years. USAC provided the FCC with data as of June 30, 2010. Table 4.1 summarizes commitments and disbursements by applicant type and by service type for each funding year. Because of the appeals process, funding commitments and disbursements can be made after the end of the funding year. Also, disbursements may continue beyond the end of the funding year in the event of delayed internal connections installation. Thus, disbursements for the two most recent funding years will rise substantially.

Table 4.2 summarizes commitments and disbursements by state and by type of applicant for funding years 2007 through 2009. Table 4.3 is based on the same data as Table 4.2 and shows, on a state-by-state basis, funding commitments and disbursements for the three major types of services: internal connections, Internet access, and telecommunications. The lists of individual funding commitments and disbursements are too lengthy to include in this report, but are available online from USAC's website.⁵ Information for earlier funding years can be found in earlier editions of the *Universal Service Monitoring Report*.⁶

Table 4.4 summarizes, for funding years 2007 through 2009, fund disbursements by type of service provider entity that provides the underlying service to the school or library, and by the way USAC was billed (whether by the school/library using the FCC Form 472, or by the service provider directly using the FCC Form 474).⁷ Unlike the other tables in this section, this table is based on information in USAC's *Federal Universal Service Support Mechanism Fund Size Projections for the Fourth Quarter 2010*, and reflects disbursements as of June 30, 2010.

Table 4.5 shows, for funding years 2007 and 2008, commitments and disbursements on a per-student basis. Although both public and private schools are eligible for E-rate support, only public school enrollment data was available on a state-by-state basis from the Department of Education, so the amounts per student may be slightly inflated. Unused funding commitments have been used to offset collections for later years.

Tables 4.6 and 4.7 show, on an aggregated national level, commitments and disbursements per student for each category of eligible service: 1) internal connections, 2) Internet access, 3) telecommunications, and 4) total funding, for funding years 2007 through

5 See *Data Retrieval Tool* on USAC's website at www.sl.universalservice.org/funding/OpenDataSearch (last viewed Dec. 15, 2010).

6 Earlier editions of the Monitoring Reports are available at www.fcc.gov/wcb/iatd/monitor.html (last viewed Dec. 15, 2010).

7 In both cases, the service provider initially receives the money. When the applicant has paid the entire bill up front, the service provider is required to reimburse the applicant.

2009. The figures for funding year 2009, particularly disbursements, should be viewed as preliminary and likely subject to adjustment in the future.

Source: Raw data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC.

Activity through June 30, 2010. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

Table 4.3
Schools and Libraries Funding Commitments and Disbursements by State and by Type of Service
Funding Year 2007: July 1, 2007 through June 30, 2008

Source: Raw funding data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC.

Activity through June 30, 2010. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.
