**FEDERAL COMMUNICATIONS COMMISSION ANNOUNCES WORKSHOP ON
THE 4.9 GHz BAND: SPECTRUM DEDICATED TO PUBLIC SAFETY
FOR BROADBAND USE**

Washington, D.C. – The Federal Communications Commission’s Public Safety and Homeland Security Bureau (Bureau) today announced it will hold a workshop on the 4.9 GHz Band: Spectrum Dedicated to Public Safety for Broadband Use. This event will focus on how public safety can increase utilization of this spectrum. The workshop will be held on Friday, February 25, 2011, from 9:00 a.m. to 1:00 p.m. in the Commission Meeting Room (TW-C305).

The 4940–4990 MHz (4.9 GHz) licensing rules adopted in 2003 by the Commission provide licensees with authority to operate base and mobile units (including portable and handheld units) and operate temporary (one year or less) fixed stations anywhere within the area authorized by the license. Permissible operations include unattended and continuous operation, voice, data and video operations, while aeronautical mobile operations are prohibited. Permanent fixed point-to-point and point-to-multipoint stations in the band must be licensed individually on a site-by-site basis.

Many public safety agencies have identified specific mission-critical applications, day-to-day fixed use and unique solutions using the 50 megahertz of spectrum dedicated to public safety in 4.9 GHz band. The workshop will address current 4.9 GHz deployments by public safety entities to include system implementation, configuration, performance, and types of uses and applications running over the 4.9 GHz networks. The workshop will also look at collaborating ideas for use of the 4.9 GHz spectrum in areas such as prior coordination, operating on a non-interference basis and other technical enhancements that may be needed. It will also address possible improvements of the 4.9 GHz band related to policy, rules and regulations. The Commission will release a complete agenda closer to the event date.

The workshop will be open to the public; however, admittance will be limited to the seating available. Individuals interested in attending this event must pre-register on-line at <http://www.fcc.gov/pshs/event-registration2.html>, where they will be asked to provide their name, title, organization affiliation, and contact information. Individuals may also contact Deandra Wilson at Deandra.Wilson@fcc.gov or via phone at 202-418-0703 regarding pre-registration. The deadline for pre-registration is Wednesday, February 23, 2011.
