FCC LIBRARY INVITES PARTICIPANTS FOR DIGITAL SHOWCASE

Washington, D.C. – Each year, the FCC Library proudly celebrates National Library Week with a staff Open House. This year, in partnership with the FCC Technology Experience Center, the FCC Library's Open House will include a digital showcase celebration. This digital showcase recognizes that local, state, federal, and academic libraries offering electronic or digital content have become 24/7 cyberspace branch libraries accessed by a wide array of personal use devices. The event will take place on Wednesday, April 11, 2012.

The FCC Technology Experience Center, located within the FCC Library, is a communications technology laboratory where FCC staff and visitors have hands-on opportunities to preview communications content and devices. In recognition of National Library Week, there will be library-specific experiences for accessing content, using devices, and reviewing application solutions. In addition, there will be an electronic compilation of library websites dedicated to providing free access to local, state, and federal electronic content.

Manufacturers and vendors are invited to participate in this event. Of particular interest are smart phones, eBook readers, tablets, technology kiosks and library-specific application solutions. For consideration and further information contact Lisa Leyser, FCC Library Director, at Lisa.Leyser@fcc.gov or 202.418.0450 no later than April 2, 2012.

The provision of equipment for display and other exhibited material is strictly voluntary and is not contingent on and does not imply any expected benefit to the exhibitor. Acceptance of any exhibit by the FCC does not constitute endorsement of the device, its manufacturer, vendor, or any company offering such devices.
