Report No. SPB-246

Released: December 5, 2012

Request for Coordination of Canadian Earth Stations with USA Terrestrial Fixed Stations

The government of Canada has requested frequency coordination for the following Canadian earth stations operating in the 3700-4200 MHz and 5925-6425 MHz frequency bands. Interested parties may file comments regarding this request no later than January 5, 2013. If no adverse comments are received by that date, these earth stations will be considered satisfactorily coordinated with the USA and Canada will be so advised.

In accordance with Section 1.51(c) of the Commission's rules, an original and four copies of all pleadings must be filed with the Secretary at the above address. All correspondence concerning this matter must reference this public notice using "Report No. SPB-246".

For further information, contact Towanda Bryant, Satellite Division, International Bureau, (202) 418-7245 or Towanda.Bryant@fcc.gov.

GOVERNMENT OF CANADA REQUESTS COORDINATION WITH USA

SERVICE:	FIXED SATELLITE	CLASS OF STATION:	FIXED EARTH STATION	
License #:			3014169	
Location:			MONTREAL, QC	
Coordinates:			45 31 18N 073 33 01W	
Ground Height (AMSL)/Antenna Height (AGL):			20 m / 6 m	
Antenna Diameter/TX Gain/RX Gain:			7.3 m / 51.1 dBi / 48.1 dBi	
Antenna Azimuth/Elevation Angle:			234.7 deg / 21.50 deg	
Transmitter Polarity:			horizontal or vertical selectable	
Maximum Power Density (dBW/Hz):			-37.0 dBW/Hz	
Satellite Operating Arc:			118.7 deg W	
Satellite transmission VIA:			ANIK F3	
Date Effective:			July 24, 2012	
TX Frequency (MHz)	Bandwidth (kHz)	Emissions	EIRP (dBW)	RX Frequency (MHz)
6045.000	36000.0	K1DEN	76.6	3860.000
