RE: Non-Geographic 5XX-NXX Codes

Dear Ms. Veach:

At the September 20, 2012 meeting of the North American Numbering Council (NANC), the NANC concurred with the recommendation of the Industry Numbering Committee to add a note to the end of the definition of Assigned numbers in the 5XX-NXX Code Assignment Guidelines as follows:

“Assigned numbers are numbers working in the PSTN under agreement such as a contract or tariff at the request of specific end users or customers for their use, or numbers not yet working but having a customer service order pending. Numbers that are not yet working and have a service order pending for more than five days shall not be classified as assigned numbers (47 CFR § 52.15 (f) (1) (iii)). **Note: In the current context of these Non-Geographic 5XX-NXX Code Assignment Guidelines, working in the PSTN means using a NANP (E.164) addressing scheme. [emphasis added]**”

Please feel free to contact me or Natalie McNamer, INC Chair, (Natalie.McNamer@T-Mobile.com) if you or members of your staff have any questions regarding this NANC submittal.

Sincerely,

Betty Ann Kane
Chairman
North American Numbering Council
