

**Federal Communications Commission  
CAFIH - CAM 4 - Report Version 5.0  
December, 2013**

All reports utilize CAM 4 output, providing an Estimated Support & Locations per Carrier per State per Study Area.

Report Reference Number	Reports
1.1	Results with Funding Threshold of \$48
1.2	Results with Funding Threshold of \$52

Company Name Cross Reference Table

PRTC	PUERTO RICO TELEPHONE CO.
VIT	VIRGIN ISLANDS TEL. CORP. DBA INNOVATIVE TELEPHONE
VZN	VERIZON
Wind	WINDSTREAM COMMUNICATIONS

The Commission directed the Bureau to set a funding threshold and an extremely high cost threshold in the cost model, and that support will be offered to the price cap carrier in the census blocks where the average cost per location is equal to or greater than the funding threshold but less than the extremely high cost threshold, excluding census blocks that are determined to have an unsubsidized competitor. The reports illustrate potential results under two alternative funding thresholds for implementation of the offer of model-based support to price cap carriers. Column F shows the number of residential and small business locations in the census blocks that would be subject to the offer of model-based support in exchange for a state-level commitment. Column G shows how many of those locations are not currently served with broadband and thus would be receiving broadband for the first time. Column H shows the number of locations that fall above the extremely high cost threshold, where the price cap carrier making the state-level commitment would not be required to extend broadband service, while Column I shows what percentage that number is of all the Price Cap locations.

The reports can be filtered by the user by clicking on the drop down menu in row 9 to focus on results for a subset of carriers and/or a subset of states. If only one carrier is selected, the results for that carrier are shown in row 6. If multiple carriers are selected, the results are shown in row 6. Row 7 will display state price cap totals when selecting a single state or multiple states. Row 8 is the Nationwide Price Cap total. Support amounts for the state-level commitment for a particular carrier in a particular state thus can be accessed by selecting that carrier in Column B and the desired state in Column A. The offer of support in a given state for a given price cap carrier is the sum of the amounts shown for individual study areas within the state.

Please note: All reports utilize the following:

- 1 CAF II Budget Amount of \$1.75b (assumes \$50 million annually in Connect America ICC funding)
- 2 CAM 4 Solution Set = SS20131202CAM4
- 3 Report 1.1 utilizes a Funding Threshold of \$48 and an Extremely High Cost Threshold of \$170.815, Voice Cable Voice Fixed Wireless / No Take Rate Demand Locations Passed
- 4 Report 1.2 utilizes a Funding Threshold of \$52 and an Extremely High Cost Threshold of \$197.14, Voice Cable Voice Fixed Wireless / No Take Rate Demand Locations Passed
- 5 Funding Threshold selected to illustrate results
- 6 Results reflect support model detail results at the 'service area' level, rolled-up to study areas by SAC, since some SAC areas cross state lines.
- 7 Unit costs are calculated on a per-location-passed basis
  
- 8 Census blocks shown as served on National Broadband Map (data as of December 2012) by 3/768 cable or fixed wireless providers that do not receive high-cost support and reporting voice connections on FCC Form 477 (data as of December 2012) excluded from support calculations (Voice Cable/Voice Fixed Wireless).
- 9 Total Price Cap Locations, Column E, are pulled from a separate query with Funding Threshold set to 0, Extremely High Cost Threshold set to 10,000,000 with both cable unserved and fixed wireless unserved set to false.
- 10 Total Number of Price Cap Locations in Census Blocks Subject to Offer of Phase II Funding, Column F, exclude areas and locations served by an unsubsidized competitor.  
Total Number of Price Cap Locations in Census Blocks Above Extremely High Cost Threshold, Column H, are pulled from a separate query with Funding Threshold set to 0 and Extremely High Cost Threshold equaling the upper threshold value (\$48 report = \$170.815, \$52 report = \$197.14) with both cable unserved and fixed wireless unserved set to false.
- 11
