

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON

OFFICE OF
THE CHAIRMAN

June 18, 2014

The Honorable Doris Matsui
U.S. House of Representatives
2446 Rayburn House Office Building
Washington, D.C. 20515

Dear Representative Matsui:

Thank you for sharing your views on the importance of the Broadcast Television Incentive Auction, and for your support of the Commission's actions to promote competition.

The Incentive Auction is a once-in-a-lifetime opportunity to expand the benefits of mobile wireless coverage and competition to consumers across the Nation – particularly consumers in rural areas – offering more choices of wireless providers, lower prices, and higher quality mobile services, while also providing a game-changing financial opportunity to broadcasters and fully funding the Public Safety Trust Fund for FirstNet.

On May 15, the Commission adopted final rules for the Incentive Auction and for Mobile Spectrum Holdings. Consistent with the Middle Class Tax Relief and Job Creation Act of 2012, all who want to participate in the Incentive Auction will be able to bid. A priority of the auction will be to ensure that nationwide providers that already possess significant amounts of low-band spectrum are not able to use the auction to keep competitors from accessing the spectrum they need to provide additional choices to consumers. This is vitally important to rural communities, where such spectrum is necessary for competitors to provide improved service to areas that currently have poor or no wireless coverage, and also in urban areas where low-band spectrum allows cost-effective, reliable coverage in urban canyons and deep into buildings. The market-based reserve for the Incentive Auction appropriately balances the goals of promoting competition and making more spectrum available to all wireless providers.

As you note, the Incentive Auction will fully fund any remaining funds necessary for FirstNet. Specifically, under the rules the Commission recently adopted, the proceeds of the auction must be sufficient to fund incentive payments to participating broadcasters, the other mandatory expenses set forth in section 6403(c)(2) of the Spectrum Act,¹ and any PSTF amounts still needed in connection with FirstNet after the close of the H Block and AWS-3 auctions.² The Spectrum Act establishes the priority for making payments or deposits from the PSTF as amounts are deposited into the Fund, including for FirstNet and for deficit reduction.

¹ The Spectrum Act requires only that the forward auction generate proceeds sufficient to pay winning bidders in the reverse auction and cover relevant administrative costs of the auction and an estimate of relocation costs subject to reimbursement.

² I expect that these two auctions will nearly or fully fund the PSTF with amounts needed for FirstNet, even before the Incentive Auction takes place.

Thank you again for sharing your support of the Commission's efforts in creating the first ever Incentive Auction, while bringing the benefits of competition to consumers across the nation. I look forward to working with you toward our mutual goal of a successful auction for the benefit of all American consumers.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Wheeler", with a stylized flourish extending from the end.

Tom Wheeler

OFFICE OF
THE CHAIRMAN
