

Format of Data

All data should be submitted in a .csv (comma-delimited) format. The sheets in the workbook provide a template for how the tables should be designed.

The required format for the entries in each column/field is indicated in the instructions for each sheet.

"Census Block to Distribution Areas" Table

For each census block in which the Company makes any MVPD Service, Internet Access Service, or telephone service, available to any customer location in the census block, state the distribution area that the census block belongs to in the table below.

In general, this table is intended to provide a correspondence between distribution areas and the Census blocks that are contained within each distribution area.

Column	Variable Name	Format	Possible Entries/Example Entries	Description
A	block	Text	110010062021037	15-digit FIPS code for the census block using the 2010 identifier from the 2010 TIGER/Line Block State-based Shapefile or Block County-based Shapefile
B	cllida	Text	PDMTALMA2301	The CLLI distribution area code that corresponds to the Census block
C	locations	Integer	43	Total number of Customer locations where the Company offers service in the distribution area that are contained in the stated Census block

Notes by Column:

A: The block identifier is a concatenation of Census 2010 state FIPS code, Census 2010 county FIPS code, Census 2010 census tract code and Census 2010 tabulation block number.

Please see the 2010 TIGER/Line Shapefiles Technical Documentation, Chapter 5, Part 5.2 at <http://www.census.gov/geo/maps-data/data/pdfs/tiger/tgrshp2010/TGRSHP10SF1CH5.pdf>.

B: If multiple distribution areas serve customer locations in a census block, multiple observations should be created for the Census block, with each Census block/Distribution Area combination as a separate entry.

block	clida	locations
