

NOTE TO RESPONDENTS

The Commission will provide a Database Container file for respondents to load and submit certain data in response to the special access data collection, e.g., data on locations with connections, prices, etc. At this time, the Database Container is undergoing testing and is not yet available. When available, filers will use the link on the “Getting Started” webpage to download the Database Container, and additional instructions on loading, validating, and submitting the Database Container will be provided in Section 3.4 of the System Guide.

Until the Database Container is available, filers will be unable to complete the submission process using the “Full Website” filing option. For updates on the availability of the Database Container, please check the “Special Access Overview” webpage.
