¹ See *International Telecommunications Data*, available at <http://www.fcc.gov/encyclopedia/international-telecommunications-traffic-reports> and <https://www.fcc.gov/general/section-4362-online-filing>. Totals for reporting periods 2000-2011 include a small amount of traffic between domestic U.S. and offshore U.S. points. Although the Commission no longer requires carriers to report traffic between U.S. points that were previously classified as international, a few carriers continued to report such traffic for the 2011 reporting period. See *Reporting Requirements for U.S. Providers of International Telecommunications Services; Amendment of Part 43 of the Commission's Rules*, IB Docket No. 04-112, First Report and Order and Further Notice of Proposed Rulemaking, 26 FCC Rcd 7274, 7293-95, paras. 51-55 (2011).

² Facilities ICS information for years 2000-2013 is for Facilities International Message Telephone Service (IMTS) only. Information for 2014 is for Facilities ICS (includes IMTS and Interconnected VoIP Service and International Call Completion Service for IMTS or Interconnected VoIP Service).

³ Starting in 2003, data for carriers requesting confidential treatment are broken out between international telephone, private line, and miscellaneous services. Prior to year 2003, data for carriers requesting confidential treatment are included in “Total International.” For a list of carriers requesting confidential treatment, see <https://www.fcc.gov/general/international-traffic-and-revenue-report>.

Notes: (1) ICS Resale information for years 2000-2013 is for Pure Resale. Information for 2014 is for ICS Resale.

(2) Total International includes revenue for Facilities ICS, ICS Resale, Private Line, and Miscellaneous services.

(3) ICS Resale data include only data from service providers that reported \$5 million or more in ICS Resale revenue.

* Traffic measures for Facilities ICS service (includes International Message Telephone Service (IMTS) and Interconnected VoIP Service and International Call Completion Service for IMTS or Interconnected VoIP Service) include both U.S.-billed traffic and foreign-billed traffic, but excludes most traffic that transits the United States. Private line traffic measures above are 64 kbps circuits for service provided over facilities circuits only. ** Private line 64 kbps equivalent circuits for 2014 have been revised since the 2014 U.S. International Traffic and Revenue Report was published in 2016 due to revised data received by the Commission (from 494 million to 113 million).
