FCC TO HOST INFO SESSION ON TECHNOLOGY TRANSITIONS

Washington, D.C. – The FCC’s Consumer and Governmental Affairs Bureau will host an Info Session on Technology Transitions on Monday, September 26, 2016 from 1-2 p.m. in the Commission Meeting Room, located at 445 12th Street, SW, Washington, DC 20554.

The nation’s telephone companies in the United States are currently upgrading the technology that delivers phone service. Existing copper lines are being replaced with fiber or wireless networks that use Internet Protocol technology. These processes are called the “technology transitions” (formerly referred to as the “IP Transition”). This info session will inform consumers about how the switch from copper networks to new technologies will affect them.

The event will be open to the public. Though an RSVP is not necessary, we encourage attendees to send an email to techtransitionsinfo@fcc.gov by September 25 so we can facilitate entry into the building. Please remember to bring a current, government-issued photo ID in order to access the building on the day of the event.

Those interested in participating online may do so by visiting <https://www.fcc.gov/general/live>. During the event, the public can submit comments and questions by emailing livequestions@fcc.gov or via [@FCC’s](https://twitter.com/FCC) Twitter using the hashtag #FCClive.
