**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-16-00022165

On June 12, 2017, Agents from the New York Office (New York Office) of the Federal Communications Commission's (FCC or Commission's) Enforcement Bureau (Bureau) conducted a follow-up investigation into the complaint of an unlicensed FM station operating on the frequency 98.9 MHz in Bronx, New York. The Agents confirmed by direction finding techniques that radio signals on frequency 98.9 MHz were still emanating from an apartment on E. 243rd Street, Bronx, New York. The Commission's records show no license issued for operation of a radio station on 98.9 MHz at this location in Bronx, New York. At the time of the New York Office's initial investigation on April 18, 2017, you admitted to the Agents that you were the operator of the radio station on 98.9 MHz and acknowledged that you had no authorization to operate the radio station.

Radio stations on a range of frequencies,<sup>1</sup> including 98.9 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> The field strength of your signal on frequency 98.9 MHz was measured at 6,294 microvolts per meter ( $\mu\text{V}/\text{m}$ ) at 515.24 meters, which exceeded the maximum permitted level of 250  $\mu\text{V}/\text{m}$  at 3 meters for non-licensed devices. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

**UNLICENSED OPERATION OF THIS RADIO STATION MUST BE DISCONTINUED IMMEDIATELY.**

You have ten (10) days from the date of this notice to respond with any evidence that you have authority to operate granted by the FCC.
