

July 6, 2017

The Honorable John J. Faso U.S. House of Representatives 1616 Longworth House Office Building Washington, D.C. 20515

Dear Congressman Faso:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. As you know, I grew up in Parsons, Kansas and during my time at the Commission have traveled to locations ranging from Barrow, Alaska to Laurens, Iowa, and Carthage, Mississippi. Through these experiences and meeting with countless Americans and carriers across the country, I have seen what access to affordable high-speed Internet access can do for a community—for its schools, its libraries, and its hospitals and for those Americans struggling to stay afloat.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers were incented to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies—not because consumers didn't want it, but, as you note in your letter, because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem. But as your letter rightly points out, we have not. Despite the Commission's efforts in the 2016 *Rate-of-Return Reform Order*—an effort that would not have happened but for the resounding call to action from Congress as expressed in the letters you mention—I still hear from small carriers that offering stand-alone broadband would put them underwater; that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the *Order* needlessly complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural America.

Page 2—The Honorable John J. Faso

imposed on stand-alone broadband lines. Also in May, I circulated an order to address certain duplicative reporting requirements imposed on rural providers. I look forward to continue working with my colleagues on these issues.

Although I hope these changes will help, you may be right that something more fundamental is needed. After all, if the *Order* is not carrying out its stated purpose of advancing broadband deployment in rural America, we cannot ignore that problem—for time is not on the side of rural Americans.

I appreciate your views on this matter. They will be included in the record of this proceeding and considered as part of the Commission's review. Please let me know if I can be of any further assistance.

Sincerely.

July 6, 2017

The Honorable Chuck Fleischmann U.S. House of Representatives 2410 Rayburn House Office Building Washington, D.C. 20515

Dear Congressman Fleischmann:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. As you know, I grew up in Parsons, Kansas and during my time at the Commission have traveled to locations ranging from Barrow, Alaska to Laurens, Iowa, and Carthage, Mississippi. The business case for stand-alone broadband didn't exist for some rural telephone companies—not because consumers didn't want it, but, as you note in your letter, because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem. But as your letter rightly points out, we have not. Despite the Commission's efforts in the 2016 Rate-of-Return Reform Order—an effort that would not have happened but for the resounding call to action from Congress as expressed in the letters you mention—I still hear from small carriers that offering stand-alone broadband would put them underwater; that the rates they have to charge exceed the rates for bundled services because of the different regulatory treatment. This is unfortunate but unsurprising. As I said at the time, the Order needlessly complicated our rate-of-return system and in many ways made it harder, not easier, for small providers to serve rural America.

Page 2—The Honorable Jared Huffman

imposed on stand-alone broadband lines. Also in May, I circulated an order to address certain duplicative reporting requirements imposed on rural providers. I look forward to continue working with my colleagues on these issues.

Although I hope these changes will help, you may be right that something more fundamental is needed. After all, if the *Order* is not carrying out its stated purpose of advancing broadband deployment in rural America, we cannot ignore that problem—for time is not on the side of rural Americans.

I appreciate your views on this matter. They will be included in the record of this proceeding and considered as part of the Commission's review. Please let me know if I can be of any further assistance.

Sincerely.

July 6, 2017

The Honorable Will Hurd U.S. House of Representatives 317 Cannon House Office Building Washington, D.C. 20515

Dear Congressman Hurd:

Thank you for your letter regarding the importance of delivering affordable access to high-speed Internet to all Americans—including those in high-cost rural areas. As you know, I grew up in Parsons, Kansas and during my time at the Commission have traveled to locations ranging from Barrow, Alaska to Laurens, Iowa, and Carthage, Mississippi. Through these experiences and meeting with countless Americans and carriers across the country, I have seen what access to affordable high-speed Internet access can do for a community—for its schools, its libraries, and its hospitals and for those Americans struggling to stay afloat.

Four years ago, I called on the Commission to tackle the issue of affordable broadband in rural America head on. The problem back then was that the Universal Service Fund predicated support on providing voice service. This meant bundled telephone/broadband offers could get support while standalone broadband could not. The perverse result was that carriers were incented to take universal service support and offer telephone/broadband bundles (even if consumers could not afford them) while not offering standalone broadband. The business case for stand-alone broadband didn't exist for some rural telephone companies—not because consumers didn't want it, but, as you note in your letter, because our arcane rules penalized companies for offering it.

I wish I could tell you that the FCC has fixed this problem. But as your letter rightly points out, we have not.
