Easton, Maine  
ESTNMEMA

Presque Isle Remote Terminal  
P 24.1 RT 5 XBOX, Egypt Rd

**Planned Implementation or Retirement Date:** December 31, 2017

**Description of Foreseeable Impact:** These network changes will create the potential for spectral interference on the Central Office (CO)-based ADSL and/or a Digital Design Loop (DDL) loops that share the same binder groups as the Remote Terminal (RT) ADSL within the copper distribution feeder cable past the Feeder Distribution Interface (FDI).

**Description of Change:** When FairPoint Communications NNE is installing a Digital Line Subscriber Access Multiplexer (DSLAM) or Litespan to provide Digital Subscriber Line (DSL) service from a Remote Terminal (RT) that is less than 30,000 feet from the Central Office and only when copper feeder is present between the Central Office and RT.
