**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-17-00024803

On April 4, 2018, an Agent from the Boston Office of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) investigated a complaint of an unlicensed FM station operating on the frequency 99.7 MHz in Brockton, Massachusetts. The Agent confirmed by direction finding techniques that radio signals on frequency 99.7 MHz were emanating from a property on North Warren Avenue in Brockton, Massachusetts. Public records list you as the owner of this property. The Commission's records show that no license was issued for operation of a radio station on 99.7 MHz in Brockton, Massachusetts.

Radio stations operating on a range of frequencies,<sup>1</sup> including 99.7 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> The Agent measured the field strength of the signal on the frequency 99.7 MHz for the station and found that it exceeded the maximum permitted level of 250  $\mu$ V/m at 3 meters for non-licensed devices. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and will subject the operator to severe penalties, including, but not limited to, *in rem* seizure of the offending radio
