**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-17-00025810

On May 2, 2018, Agents from the New York Office of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) investigated a complaint of an unlicensed FM station operating on the frequency 87.9 MHz in Danbury, Connecticut. The Agents confirmed by direction finding techniques that radio signals on frequency 87.9 MHz were emanating from a multi-family dwelling on Keeler Street, Danbury, Connecticut. Through investigation, Agents confirmed that you are the operator of the unlicensed radio station. The Commission's records show that no license was issued for operation of a radio station on 87.9 MHz in Danbury, Connecticut.

Radio stations operating on a range of frequencies,<sup>1</sup> including 87.9 MHz must be licensed by the FCC pursuant to Section 301 of the Communication Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> Agents measured the field strength of the signal on the frequency 87.9 MHz for the station and found that it exceeded the maximum permitted level of 100 microvolts per meter ( $\mu\text{V}/\text{m}$ ) at 3 meters for non-licensed devices operating in the band 30-88 MHz. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and could subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem* arrest action against the offending radio equipment, and criminal sanctions, including imprisonment.<sup>5</sup>
