NOTICE OF UNLICENSED OPERATION

Case Number: EB-FIELDSCR-18-00026038

An Agent in the Dallas Office of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) received a complaint of an unlicensed FM station operating on frequency 98.5 MHz. On March 2, 2018, the FCC confirmed by direction finding techniques that radio signals on frequency 98.5 MHz were emanating from your residence located on Ponce De Leon Avenue, San Juan PR 00907. According to the property administrator, you are the sole lessee of the property. The Commission's records show that no license was issued for operation of a broadcast station on 98.5 MHz at this location in San Juan, Puerto Rico.

Radio stations operating on certain frequencies,¹ including 98.5 MHz, must be licensed by the Commission pursuant to Section 301 of the Communications Act of 1934, as amended (Act).² The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.³ On March 2, 2018, the FCC found that the station at your home was operating at a power level that exceeds the level permitted by Part 15. The field strength of the signal on frequency 98.5 MHz was measured at levels exceeding the maximum permitted level of 250 microvolts per meter ($\mu\text{V}/\text{m}$) at 3 meters for non-licensed devices. Therefore, this station is operating in violation of Section 301 of the Act.⁴

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and could subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem* seizure of the offending radio equipment, and criminal sanctions including imprisonment.⁵

UNLICENSED OPERATION OF THIS RADIO STATION MUST BE DISCONTINUED IMMEDIATELY AND MUST NOT RESUME.
