**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-18-00027249

On September 26, 2018, Agents from the New York Office of the Federal Communications Commission's (FCC or Commission's) Enforcement Bureau (Bureau) investigated an unlicensed FM station operating on the frequency 94.5 MHz in Bronx, New York. The Agents confirmed by direction finding techniques that radio signals on frequency 94.5 MHz were emanating from a multi-family dwelling at 1824 Monroe Avenue in Bronx, New York. The Commission's records show that no license was issued for operation of a radio station on 94.5 MHz at this location in Bronx, New York.

Radio stations operating on a range of frequencies,<sup>1</sup> including 94.5 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> The Agents found that the station was operating at a power level that exceeds the level permitted by Part 15. On September 26, 2018, the Agents measured the field strength of the signal on the frequency 94.5 MHz for the station and found that it exceeded the maximum permitted level of 250  $\mu$ V/m at 3 meters for non-licensed devices. Therefore, this station was operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and will subject the operator to severe penalties, including, but not limited to, *in rem* seizure of the offending radio
