**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDSCR-18-00027778

On September 22 and October 25, 2018, Agents from the Miami Office (Miami Office) of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau investigated an unlicensed FM station operating on the frequency 92.1 MHz in Homestead, Florida. The Agents confirmed by direction finding techniques that radio signals on frequency 92.1 MHz were emanating from a residential property on NE 42<sup>nd</sup> Ave., Homestead, Florida. Public records list you as the property owner. The Commission's records show that no license was issued for operation of a broadcast station at this location on 92.1 MHz in Homestead, Florida.

Radio stations operating on a range of frequencies,<sup>1</sup> including 92.1 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> On September 22 and October 25, 2018, the Agents found that the station at your residence was operating at a power level that exceeds the level permitted by Part 15. The field strength of the signal on frequency 92.1 MHz was measured at levels exceeding the maximum permitted level of 250 microvolts per meter ( $\mu\text{V}/\text{m}$ ) at 3 meters for non-licensed devices. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and could subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem*
