Report No. SES-02125

Wednesday December 19, 2018

Satellite Communications Services re: Satellite Radio Applications Accepted For Filing

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of the applications if, upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations and its Policies. Final action will not be taken on any of these applications earlier than 30 days following the date of this notice. 47 U.S.C. § 309(b). All applications accepted for filing will be assigned call signs, or other unique station identifiers. However, these assignments are for administrative purposes only and do not in any way prejudice Commission action.

Application for Modification

Class of Station: Fixed Earth Stations

Nature of Service: Earth Exploration Satellite Service

Viasat requests modification of its fix earth station in Pendergrass, GA to add as a point of communication the Orbital Test Bed (OTB) (NGSO) satellite (Call Sign WJ2XNU) that will operate in a 720 km x 720 km orbit at 24 degrees inclination. This earth station will continue to operate Earth-to-space and space-to-Earth links in the 2025-2120 MHz frequency band but with different emissions when communicating with WJ2XNU. The emissions will be at power levels that are at a lower EIRP per carrier, but at a higher EIRP per carrier density levels, than the emissions currently authorized. IBFS File No. SES-AMD-20181211-03424 requests an extension of the deadline for commencement of operations of this earth station.
