**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-18-00028216

On December 12, 2018, an Agent from the Boston Office of the Federal Communications Commission's (FCC or Commission's) Enforcement Bureau (Bureau) investigated a complaint of an unlicensed FM station operating on the frequency 88.3 MHz in Hyde Park, Massachusetts. The Agent confirmed by direction finding techniques that radio signals on frequency 88.3 MHz were emanating from the residential property on Clare Avenue in Boston, Massachusetts. Property records list you as the owner of the property. The Commission's records show that no license was issued for operation of a radio station on 88.3 MHz at this location in Boston, Massachusetts.

Radio stations operating on a range of frequencies,<sup>1</sup> including 88.3 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>3</sup> Agents measured the field strength of the signal on the frequency 88.3 MHz for the station and found that it exceeded the maximum permitted level of 250  $\mu$ V/m at 3 meters for non-licensed devices. Thus, this station is operating in violation of Section 301 of the Act.<sup>4</sup>

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and may subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem*
