**NOTICE OF UNLICENSED OPERATION**

On October 17, 2018 and November 7, 2018 Agents from the Los Angeles Office (Los Angeles Office) of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) responded to a complaint of an unlicensed FM station operating on the frequency 99.3 MHz in Oxnard, CA. The Agents confirmed by direction finding techniques that a radio signal on 99.3 MHz was emanating from your place of business located at 550 North A Street, Suite 6B in Oxnard, CA.

The Commission's records show that no license was issued for operation of a broadcast station on 99.3 MHz at this location in Oxnard, CA. The Los Angeles Office investigated and determined you are the owner or operator of the unlicensed FM station on 99.3 MHz.

Radio stations must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).<sup>1</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in Part 15 of the Commission's rules.<sup>2</sup> On October 17, 2018 and November 7, 2018 Agents measured the field strength of the signal on the frequency 99.3 MHz and found that it exceeded the maximum permitted level of 250 microvolts per meter ( $\mu\text{V}/\text{m}$ ) at 3 meters established under Part 15. Thus, this station is operating in violation of Section 301 of the Act.<sup>3</sup>
