NOTICE OF UNLICENSED OPERATION

Case Number: EB-FIELDSCR-19-00028687

On March 16, 2019, Agents from the Miami Office of the Federal Communications Commission's (FCC or Commission's) Enforcement Bureau investigated an unlicensed FM station operating on the frequency 98.5 MHz in Hallandale Beach, Florida. The Agents confirmed by direction finding techniques that radio signals on frequency 98.5 MHz were emanating from a residential property on Foster Road in Hallandale Beach, Florida. Public records list you as the property owner. The Commission's records show that no license was issued for operation of a radio station at this location on 98.5 MHz in Hallandale Beach, Florida.

Radio stations operating on a range of frequencies,¹ including 98.5 MHz, must be licensed by the FCC pursuant to Section 301 of the Communications Act of 1934, as amended (Act).² The only exception to this licensing requirement is for certain transmitters using or operating at a power level that complies with the standards established in Part 15 of the Commission's rules.³ On March 16, 2019, the Agents found that the station on your property was operating at a power level that exceeds the level permitted by Part 15. The field strength of the signal on frequency 98.5 MHz was measured at levels exceeding the maximum permitted level of 250 microvolts per meter ($\mu\text{V}/\text{m}$) at 3 meters for non-licensed devices. Therefore, the station is operating in violation of Section 301.⁴

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and could subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem* seizure of the offending radio equipment, and criminal sanctions including imprisonment.⁵
