

Use Instructions

This BDS TRP is for carriers that establish PCIs, APIs, SBIs, and upper SBI limits at the study area level.
The holding company BDS TRP is for carriers that establish a PCI, API, SBIs, and upper SBI limits at the holding company level.

Current entries are illustrative. Use actual data and modify spacing as needed.

Enter data in cells marked 'Input'. Output fields yield values based on formulas and input data.

Enter rates as of January 1, 2019 in the relevant cells in the study area worksheet. This worksheet adjusts these rates by applying the category relationships unfreeze and net contributor/net recipient factors, as applicable. Only carriers in NECA's Traffic Sensitive pool in TP1819 have a net contributor/net recipient factor. Other carriers enter 1.0000 as the net contributor/net recipient factor in the relevant cell of this worksheet. Carriers that did not unfreeze their category relationships enter 1.0000 as the category relationships unfreeze factor in the relevant cell in this worksheet.

Enter average monthly demand for monthly recurring rate elements over the entire base period and annual demand for non-recurring rate elements for the base period in the study area worksheet to calculate the revenues used in the price cap formulas. The worksheet multiplies monthly revenues derived from monthly recurring rates and average monthly demand by 12 to obtain annual revenues.

The term discount plans in the study area worksheet are examples. If a carrier offers discount plans with other term lengths and/or discounts, revise the relevant column headings to reflect these other term lengths, and revise the relevant formulas to reflect these other discounts to calculate the revenues for these plans.

Carriers shall reflect any exogenous cost adjustment for TRS in the TRP for the annual filing if the final contribution factor is known by May 1. Otherwise, they shall reflect this exogenous cost change in rates to become effective October 1. In the latter case, the exogenous cost adjustment for TRS shall be "grossed up" to spread the entire adjustment over the remaining months in the tariff year. The exogenous cost adjustments for NANPA and regulatory fees shall be reflected in rates that take effect October 1, reflecting that these fees are obligations covering a fiscal year that begins October 1.
