**NOTICE OF UNLICENSED OPERATION**

Case Number: EB-FIELDNER-17-00025376

On February 7, 2019 and February 13, 2019, Agents from the New York Office of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) investigated an unlicensed FM station operating on the frequency 99.3 MHz in Paterson, New Jersey. On February 7, 2019 and February 13, 2019, the Agents confirmed by direction finding techniques that radio signals on the frequency 99.3 MHz were emanating from a residence on N. Main Street in Paterson, New Jersey. Property records list you as the owner of the property. The Commission's records show that no license was issued for operation of a broadcast station on 99.3 MHz at this location in Paterson, New Jersey.

Radio stations operating on a range of frequencies,<sup>1</sup> including 99.3 MHz, must be licensed by the FCC pursuant to section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in part 15 of the Commission's rules.<sup>3</sup> On February 7, 2019 and February 13, 2019, Agents measured the field strength of the signal on the frequency 99.3 MHz for the station and found that it exceeded the maximum permitted level of 250  $\mu$ V/m at 3 meters for non-licensed devices. Thus, this station is operating in violation of section 301 of the Act.<sup>4</sup>
