**NOTICE OF UNLICENSED OPERATION**

On July 17, 2019, an Agent from the Los Angeles Office (Los Angeles Office) of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) responded to a complaint of an unlicensed FM station operating on the frequency 99.3 MHz in Oxnard, CA. The Agent confirmed by direction finding techniques that radio signals on frequency 99.3 MHz were emanating from the property located on W. Iris St., Oxnard, CA. Public records list you as the owner of the property. The Commission's records show that no license was issued for operation of a broadcast station at this location on 99.3 MHz in Oxnard, California.

Radio stations operating on a range of frequencies<sup>1</sup>, including 99.3 MHz, must be licensed by the FCC pursuant to section 301 of the Communications Act of 1934, as amended (Act).<sup>2</sup> The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in part 15 of the Commission's rules.<sup>3</sup> On July 17, 2019, an Agent measured the field strength of the signal on the frequency 99.3 MHz for the station and found that it exceeded the maximum permitted level of 250 microvolts per meter ( $\mu\text{V}/\text{m}$ ) at 3 meters established under part 15. Thus, this station is operating in violation of section 301 of the Act.<sup>4</sup>

**UNLICENSED OPERATION OF THIS RADIO STATION MUST BE DISCONTINUED IMMEDIATELY AND MUST NOT RESUME.**
