Case Number: EB-FIELDNER-19-00028679

On May 23, 2019, an Agent from the Chicago Office of the Federal Communications Commission's (FCC's or Commission's) Enforcement Bureau (Bureau) investigated an unlicensed FM station operating on the frequency 87.9 MHz in Martinsville, Indiana. On May 23, 2019, the Agent confirmed by direction finding techniques that radio signals on the frequency 87.9 MHz were emanating from the residence on Crestview Drive in Martinsville, Indiana. The Commission's records show that no license was issued for operation of a broadcast station on 87.9 MHz at this location in Martinsville, Indiana.

Radio stations operating on a range of frequencies,¹ including 87.9 MHz, must be licensed by the FCC pursuant to section 301 of the Communications Act of 1934, as amended (Act).² The only exception to this licensing requirement is for certain transmitters using or operating at a power level or mode of operation that complies with the standards established in part 15 of the Commission's rules.³ On May 23, 2019, Agents measured the field strength of the signal on the frequency 87.9 MHz for the station and found that it exceeded the maximum permitted level of 100 μ V/m at 3 meters for non-licensed devices operating in the band 30-88 MHz.⁴ Thus, this station is operating in violation of section 301 of the Act.⁵

You are hereby warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws cited above and may subject the operator to severe penalties, including, but not limited to, substantial monetary fines, *in rem*
