December 2, 2019

The Honorable Anna G. Eshoo  
U.S. House of Representatives  
202 Cannon House Office Building  
Washington, DC 20515

Dear Congresswoman Eshoo:

Thank you for your letter regarding the Commission’s efforts to advance the implementation of the Lifeline National Eligibility Verifier (National Verifier). I am committed to bridging the digital divide, and like you, I believe the Lifeline program can help us do that.

USAC and the Commission continue to work to increase the number of automated connections with states and federal eligibility systems available through the National Verifier as the rollout progresses. In this regard, I am pleased to inform you that as of September 17, 2019, the National Verifier has completed an automated connection with the Centers for Medicare and Medicaid Services to verify the eligibility of applicants who participate in Medicaid. The National Verifier is now automatically verifying the eligibility of up to 78% of consumers seeking to enroll in Lifeline. As of September 24, 2019, USAC has processed more than 626,000 new Lifeline applications since launching the National Verifier.

Commission staff and USAC also continue to work closely with the Department of Veterans Affairs to achieve an automated connection to verify Lifeline eligibility for consumers receiving benefits through the Veterans and Survivors Pension Benefits programs.

The National Verifier also has automated connections with several state systems. The FCC and USAC remain willing to work with any state, territory, or district that would like to establish an automated eligibility verification connection, including with states that express interest in establishing such a connection after the National Verifier has soft-launched in that state.

Commission staff continue to review and provide feedback on USAC’s National Verifier development and implementation plans to ensure that it is implemented in a way that promotes a more effective, efficient, and fiscally responsible Lifeline program.

Please let me know if I can be of any further assistance.

Sincerely,

Ajit V. Pai
