Re: Official Correspondence from the Federal Communications Commission and Federal Trade Commission

Dear Mr. Spalter,

On behalf of the Federal Communications Commission and the Federal Trade Commission, we express gratitude for the USTelecom Industry Traceback Group's prompt response to identify and mitigate fraudulent robocalls that are taking advantage of the national health crisis related to the Novel Coronavirus Disease (COVID-19). Robocalls and malicious spoofed calls that prey on consumer fear and anxiety during a national emergency are outrageous and extremely harmful. Our agencies are committed to taking aggressive action against anyone that engages in or facilitates such calls.

We are aware that the USTelecom Industry Traceback Group has recently identified multiple COVID-19-related calling campaigns affecting consumers in the United States. Specifically, one campaign offers a non-existent "free test kit" for COVID-19 while a second campaign offers HVAC cleaning services that falsely claim will help fight COVID-19 (hereinafter the "Robocalls").

The USTelecom Industry Traceback Group has helped identify the following entities as responsible for originating or transmitting the Robocalls:

Originator(s):

VoIPMax, (Philippines)

Oberlo Peer BPO (Pakistan)

Gateway Provider(s):

SIPJoin, (Barry Augustinsky, 6404 Pelican Crescent N., Suffolk, VA 23435);

Connexum, (Chris Cordero, 1122 E. Lincoln Ave., Suite 203, Orange, CA 92865;
Scott Kettle, 17901 Von Karman Ave., Suite 600, Irvine, CA 92614);

VoIP Terminator/BLMarketing (Muhammad U. Khan, 250 International Pkwy, Suite 108, Lake Mary, FL 32746).

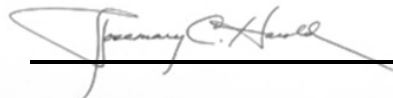

We must take swift action to protect consumers from further harm from these unlawful, malevolent robocalls during this national emergency. Therefore, concurrent with this letter, we have requested the above-named gateway providers to stop routing and transmitting such calls within 48 hours. We also have notified them that, where appropriate, we may pursue legal action against those facilitating, routing, or transmitting such robocall traffic.

Accordingly, if after 48 hours of the release of this letter, any of the above-listed gateway or originating provider(s) continues to route or transmit the above-named originators' robocalls on its network—in other words, if it continues to facilitate the entry of unlawful robocalls onto American networks—the FCC will: (1) authorize other U.S. providers to block all calls coming from that gateway or originating provider; and (2) authorize other U.S. providers to take any other steps as needed to prevent further transmission of unlawful calls originating from the originator(s) listed above. The FCC will also authorize U.S. providers to extend the obligation to prevent transmission of these unlawful calls with all entities with which they contract or that handle traffic in any part of the call path. Nothing in this letter prohibits any provider from exercising its rights to take immediate action to block unlawful calls pursuant to existing legal authority; we encourage and expect providers to take an active role in managing their networks and client relationships to protect consumers from harmful, illegal robocalls and spoofed calls.

The work of the USTelecom Industry Traceback Group is essential to combatting the deluge of unlawful robocalls and protecting consumers and is particularly vital in swiftly identifying scammers who attempt to defraud consumers during the COVID-19 disease outbreak. We thank you for your commitment to the public interest.

Please direct any inquiries regarding this letter to Kristi Thompson of the FCC at Kristi.thompson@fcc.gov or 202-418-1318 or to Ian Barlow of the FTC at ibarlow@ftc.gov or 202-326-3120.

Sincerely,

Rosemary C. Harold
Chief, Enforcement Bureau
Federal Communications Commission

Lois C. Greisman
Associate Director, Division of Marketing Practices
Federal Trade Commission
