Subject: Authorization Granted: 5850-5895 MHz Emergency STA Request - Tri-County Telephone Association, Inc.
Attachments: TCT - 5.9 GHz STA Request.pdf

Mr. Evans,

The application for an emergency STA filed by Tri-County Telephone Association, Inc. on April 13, 2020 is granted via this email. The applicant will be using the 5850-5895 MHz band to provide relief during the state-of-emergency caused by the spread of COVID-19 throughout the United States. Applicant is advised that it must ensure proper protection of incumbents in the 5850-5895 MHz band and otherwise comply with the conditions described below.

This grant is for a period of 60 days, provided the applicant files a complete FCC Form 601 application for an STA to continue its operations in the 5850-5895 MHz band within 10 days of today's date (April 14, 2020). If applicant fails to file a complete FCC Form 601 application by this date, its STA will terminate at midnight on that date. Applicant's use of the 5850-5895 MHz band is authorized on a non-interference basis and is limited by the conditions described below.

By utilizing the 5850-5895 MHz band pursuant to this STA, the applicant agrees to the following conditions:

- It understands that operations under this STA are subject to the general conditions of operation set forth in Section 15.5 of the Commission's rules (including that its access is non-exclusive and not subject to interference protection). STA recipients with overlapping grants must work together to resolve interference concerns.
- It is responsible for ensuring that it does not cause interference to existing licensees. It must review existing DSRC licenses in this band to determine any nationwide, statewide, or countywide licenses that cover or are adjacent to its service area, as well as any site licenses that are near that service area. It must then contact each of these affected licensees before beginning operation and provide its contact information so that the licensee can inform it of interference issues. It may then begin operation; it need not await a response or approval. If a complaint of interference cannot be timely resolved, operation under this STA must cease. It may not operate within 2 kilometers of any site license, regardless of notification or actual interference.
- It will operate consistent with the power levels in Section 15.407(a)(3) of the Commission's rules.
- It will attenuate emissions at 5895 MHz to a level of -27dBm or less.
- It understands that any emergency STA grant is conditioned on the applicant filing a formal STA application on FCC Form 601 (Radio Service Code QQ) within 10 days of emergency STA grant. As part of that filing, it must provide a phone number which connects directly to a person who is able to immediately resolve any interference concerns arising from its operations pursuant to this STA.
- Upon expiration of this STA, it will cease operating in the 5850-5895 MHz band and retune equipment to operate in compliance with the Commission's equipment certifications; it will confirm with the

Bureau within 14 days of expiration that it has successfully returned all of its devices to be compliant with Commission certifications.

- It understands that operations under this STA shall protect federal radiolocation services operating in the 5850-5895 MHz band and, to afford such protection, operations under this STA are prohibited within 75 kilometers of the locations listed in the table below and any additional sites specified by the Commission after initial grant.
- It understands that any structure utilized to operate pursuant to this STA must comply with the height limitations specified in Section 17.7 of the Commission’s rules or must be registered with the FAA.

The following are federal radiolocation services locations. Operations under this STA are not permitted within 75 kilometers of these locations:

Location	State	Latitude	Longitude
Ft. Rucker	AL	311947N	0854255W
Redstone Arsenal	AL	343630N	0863610W

RE: Request for Emergency Special Temporary Authority

Dear Mr. Stockdale:

Tri-County Telephone Association, Inc. (“TCT”), by its undersigned counsel, hereby requests emergency Special Temporary Authority (“STA”) to deploy and operate in the 5850-5895 MHz band on an unlicensed basis to provide wireless Internet services to supplement the Internet service that it currently provides through leased Educational Broadband Service (“EBS”) spectrum and licensed Broadband Radio Service (“BRS”) spectrum. TCT is seeking STA to provide wireless Internet services through its EBS lease and BRS license in Park County, Wyoming. Grant of an STA would help TCT provide wireless broadband service in this rural area by meeting the surge in demand for service during the coronavirus pandemic. The demand is severely taxing TCT’s ability to provide uninterrupted broadband service to its more than 10,000 subscribers. Accordingly, TCT requests an STA for a period of 60 days.

Due to the spread of the coronavirus, government entities have taken stronger steps to encourage “social distancing.” These actions and warnings have resulted in many Americans working and learning remotely from their homes – circumstances which are likely to continue for several more weeks if not months. Over the past few weeks, TCT has seen a significant increase in bandwidth usage as a result of social distancing.

To meet this increase in demand, TCT requires access to additional spectrum. TCT believes that emergency use of the 45 MHz in the 5850-5895 MHz band will be the best solution for helping it meet the increased demand. TCT’s EBS and BRS bands – in addition to its wireline infrastructure – are too congested to meet the existing and expected surge in daytime bandwidth demand – including the needs of first responders. Grant of STA will allow TCT to

meet its increased demand until it can deploy additional infrastructure to improve its network capabilities on an ongoing basis.

TCT agrees to the following conditions:

- It will apply for STA on FCC Form 601 within 10 days from grant of this STA request.
- It understands that operations under STA are secondary and do not afford interference protection.
- It will notify any Dedicated Short-Range Communications (“DSRC”) licensees in the Markets of its EBS lease and BRS license that it is operating in the 5850-5895 MHz band under STA, and will provide its contact information.
- It will comply with the interference protection provisions of 47 C.F.R. § 90.371(b).
- It will operate consistent with the power levels provided in 47 C.F.R. § 15.407(a)(3).
- It will attenuate emissions at 5895 MHz to -27 dBm or less.
- Upon expiration of the STA, it will cease operating in the 5850-5895 MHz band. For any renewal of the STA, it understands that it will need to request STA on FCC Form 601.

TCT further notes that the Commission has recently granted other wireless providers access to additional spectrum to help them meet increased customer demand for broadband during the coronavirus pandemic – including within the 5.9 GHz band. *See, e.g.,* FCC News, *FCC Grants Wireless ISPs Temporary Access to Spectrum in 5.9 GHz Band to Meet Increase in Rural Broadband Demand During Pandemic* (Mar. 27, 2020). TCT asks the FCC to afford it, as well as its customers and communities, the same benefit to “make it easier for Americans to participate in telehealth, distance learning, and telework, and simply remain connected while practicing recommended ‘social distancing.’” *Id.* (quoting *News Release, FCC Provides T-Mobile Temporary Access to Additional Spectrum to Help Keep Americans Connected During Coronavirus Pandemic* (Mar. 15, 2020)).

Should you have any questions regarding this request, please contact the undersigned.

Respectfully submitted,

/s/ Donald J. Evans _____
