For Immediate Release

**ROSENWORCEL SEEKS INPUT ON NEXT STEPS FOR POLICY
MAKERS ON OPEN RADIO ACCESS NETWORKS**

***Open RAN Notice of Inquiry Would Seek Comment on Whether and How the FCC
Might Support and Leverage This Technology to Promote U.S. Network Security and
5G Leadership***

WASHINGTON, February 23, 2021—FCC Acting Chairwoman Jessica Rosenworcel today shared with her colleagues a proposal to open a formal discussion on Open Radio Access Networks—sometimes called Open RAN—the opportunities they present, and what the FCC should be doing to promote the concept. If adopted at the Commission’s March 17 Open Meeting, this Notice of Inquiry would seek comment on the current status of Open RAN development and deployment, whether and how the FCC might foster its success, and how to support competitiveness and new entrant access to this emerging market.

“Open RAN has emerged as one promising path to drive 5G security and innovation in the United States,” said Rosenworcel. “With this inquiry, we will start to compile a record about how we can secure our vulnerable supply chains once and for all, and revitalize the nation’s 5G leadership and innovation.”

The Notice of Inquiry, if adopted, would seek comment on the current status of Open RAN development and deployment in American networks and abroad. It asks about the role of established large manufacturers and of new entrants in setting standards for this new network architecture. It seeks input on what steps should be taken by the FCC, federal partners, industry, academia, or others to accelerate the timeline for Open RAN standards development. Further, it seeks comment on any challenges or other considerations related to the deployment, integration, and testing of systems based on Open RAN specifications. The NOI also requests comment on the costs and benefits associated with Open RAN development and deployment.

Acting Chairwoman Rosenworcel has been an early advocate for American engagement and leadership in Open RAN. In 2019, she raised the issue in her [speech](#) to Mobile World Congress. She dove still deeper into the issue in [remarks](#) made at the FCC Forum on 5G Open Radio Access Networks held in September 2020.

The full agenda for the March Open Commission meeting will be outlined later today by Acting Chairwoman Rosenworcel in her latest Notes from the Acting Chairwoman:

<https://go.usa.gov/xsZTB>. The formal agenda and public drafts of the agenda items will be available tomorrow at: <https://go.usa.gov/xsZTk>.
