**Report No. SAT-01618**

**Friday March 18, 2022**

## Satellite Policy Branch Information

### Space Station Applications Accepted for Filing

The applications listed below have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of the applications if, upon further examination, it is determined that the application is not in conformance with the Commission's rules or its policies. Consideration of each satellite application in this Public Notice may depend on the Commission's action on another satellite application earlier in the queue. Petitions, oppositions, and other pleadings filed in response to this notice should conform to Section 25.154 of the Commission's rules, unless otherwise noted. 47 C.F.R. § 25.154.

**SAT-MPL-20200526-00062** E S2963 WorldVu Satellites Limited  
Date Filed: 05/26/2020 22:15:27:36600  
Modification to PDR/PPL

WorldVu Satellites Limited has petitioned for modification of its grant of U.S. market access for a 720-satellite, non-geostationary satellite system licensed by the United Kingdom. WorldVu seeks market access for an enlarged constellation of 6,372 satellites, of which 716 satellites would be deployed in an initial phase. WorldVu also requests waiver of sections 25.116(c), 25.146(a)(1), 25.155(b), and 25.157 of the Commission's rules, to the extent necessary. The modified WorldVu system would continue to operate at an approximate altitude of 1200 km using the 10.7-12.7 GHz (space-to-Earth), 14-14.5 GHz (Earth-to-space), 17.8-18.6 GHz (space-to-Earth), 18.8-19.3 GHz (space-to-Earth), 27.5-29.1 GHz (Earth-to-space), and 29.5-30 GHz (Earth-to-space) bands. This petition, as amended, is being referred to the relevant Executive Branch agencies for their views on any national security, law enforcement, foreign policy or trade policy concerns related to the potential for routing of U.S. traffic outside the United States through inter-satellite links without the use of a gateway earth station located in the United States.
