In the *Enhanced A-CAM Order*, FCC 23-60, the Commission directed the Wireline Competition Bureau to extend offers of Enhanced A-CAM model-based support, within parameters set by the Commission, to eligible rate-of-return carriers. The illustrative results presented in this file represent the Bureau’s preliminary effort to calculate support consistent with the *Enhanced A-CAM Order*, using the support parameters under three scenarios summarized in the table above. A detailed description of the methodology used is provided in the “Enhanced A-CAM Support Calculations Methodology and Data Sources,” available at <https://docs.fcc.gov/public/attachments/DOC-395739A1.pdf> (“Methodology and Data Sources”).

These illustrative results present a range of possible results, corresponding to three funding scenarios. As described in the Methodology and Data Sources, the upper range of each scenario assumes that no locations are removed from the support calculation as a result of enforceable commitments to deploy broadband pursuant to other Federal programs. The upper end of the range for each of the scenarios is respectively found in tabs 1.1, 2.1, and 3.1. The lower range of each scenario removes support for (“deconflicts”) locations found in the Broadband Funding Map, <https://fundingmap.fcc.gov/home>, but may be overinclusive with respect to deconflicted locations. The lower end of the range is found in tabs 1.2, 2.2, and 3.2. For each scenario presented, support is calculated at the state-level for each holding company (but see note 4, below), and then subtotaled for A-CAM I and II carriers, which are subject to the Enhanced A-CAM budget adopted by the Commission, and for CAF BLS carriers, which are not subject to the Enhanced A-CAM budget. These illustrative results should not be construed as the upper or lower bounds on Enhanced A-CAM offers, as further refinements to the methodology and data, consistent with the *Enhanced A-CAM Order*, may be appropriate.

Tables 4.1 and 4.2 summarize the number of locations for each state-level holding company (but see note 4, below), categorized by the methodology of calculating support. Table 4.1 does not remove locations associated with enforceable commitments to deploy broadband under other Federal programs, and therefore corresponds to tables 1.1, 2.1, and 3.1. Table 4.2 summarizes locations used to calculate support shown in tables 1.2, 2.2, and 3.2.

Please note:

- 1 This report relies on the A-CAM 2.6.0 Solution Set.
- 2 Unit costs are calculated on a per-location-passed basis.

3 A-CAM 2.6.0 Solution Set used coverage data based on V2 of the Broadband Data Collection to determine location-level funding eligibility. Broadband (voice and 100/20 Mbps broadband) reported by each rate-of-return carrier or its affiliates (based on the published “holding company number”) in its self-reported footprint (i.e., within its study-area boundaries) is treated as ILEC-served. Broadband reported by companies other than the in-region rate-of-return ILEC or its affiliate are classified as competitively served.

4 Although offers will be made to holding companies, encompassing all affiliated study areas at the state level, these illustrative results do not in all cases reflect such affiliations for companies currently receiving CAF BLS or for companies that have merged with other companies since their A-CAM I or II elections. Consolidating study areas for the purpose of Enhanced A-CAM offers may effect the Enhanced A-CAM support amount.

5 "Required locations" (Tables 4.1 and 4.2) are those locations that are not currently served and are not subject to an enforceable commitment to deploy qualifying broadband. These are the locations to which a carrier accepting the offer will be required to deploy broadband.

**Table 1.1**  
**Funding Scenario 1A**  
**\$300 Funding Cap/80% Alternative Funding Threshold; 50% Support for ILEC-only Served; 33% Support for ILEC-and-Competitor-Served**  
**No Deconfliction with other Federal Programs**
