2.5	Enhanced A-CAM - Revisions							

In the *Enhanced A-CAM Order*, FCC 23-60, the Commission directed the Wireline Competition Bureau to extend offers of Enhanced A-CAM model-based support, within parameters set by the Commission, to eligible rate-of-return carriers. A detailed description of the methodology used is provided in the “Enhanced A-CAM Support Calculations Methodology and Data Sources,” available at <https://docs.fcc.gov/public/attachments/DOC-396476A1.pdf> (“Methodology and Data Sources”).

Please note:

1 This report relies on the A-CAM 2.6.0 Solution Set.

2 Unit costs are calculated on a per-location-passed basis.

3 A-CAM 2.6.0 Solution Set used coverage data based on V2 of the Broadband Data Collection to determine location-level funding eligibility. Broadband (voice and 100/20 Mbps broadband) reported by each rate-of-return carrier or its affiliates (based on the published “holding company number”) in its self-reported footprint (i.e., within its study-area boundaries) is treated as ILEC-served. Broadband reported by companies other than the in-region rate-of-return ILEC or its affiliate are classified as competitively served.

4 Although offers must be accepted for all affiliated study areas at the state level, Tables 2.1 and 2.2 separate the Enhanced A-CAM support amounts calculated for affiliated A-CAM and CAF BLS recipients. A list of holding companies known to have both A-CAM and CAF-BLS recipients in a state is provided in Table 1.4.

5 In Report 2.2, locations that are currently unserved and also subject to an enforceable commit to deploy by the ILEC due to a grant from another federal agency are included with competitor-served locations.
