SPACE BUREAU ANNOUNCES OPEN HOUSE EVENT ON APRIL 18

Satellite Spectrum Coordination

The FCC's Space Bureau today announced the next steps in its Transparency Initiative for satellite spectrum coordination. The Transparency Initiative provides user-friendly information and guidance to interested parties about the Commission's procedures and what is needed to obtain authorization for space station and earth station operations.

The Space Bureau's Transparency Initiative aims to provide resources to support industry engagement with the Commission. The April 18, 2024, event will provide an overview on satellite spectrum coordination and FCC procedures. The event will close with a recognition of one-year since the Space Bureau was launched as part of the FCC's Space Innovation Agenda. On the Space Bureau's Transparency Initiative webpage, available at <https://www.fcc.gov/space/transparency-initiative>, guidance documents will be posted prior to the event.

The Space Bureau is seeking questions for it to address in its April 18 Open House. The Open House will start at 10:30 am ET as an in-person and online event. To foster a productive Open House, the Bureau staff respectfully asks interested parties to register and submit questions in advance by sending them to: satinfo@fcc.gov. Registration information for the Open House will be available at <https://www.fcc.gov/news-events/events/2024/04/satellite-spectrum-coordination>.
