Public Notice of Copper Retirement Under Rule 51.333

Consolidated Communication of Texas Company

March 14, 2024

Pursuant to Section 51.327(a) of the Commission’s rules, 47 C.F.R. § 51.327(a), Consolidated Communications of Texas Company (“Consolidated Communications”) provides the following information:

Carrier Names and Address: Consolidated Communications of Texas Company, 2116 S. 17th St., Mattoon, Illinois 61938

Contact Person: For additional information on this Notice, please contact:

Kevin J. Kastor
Sr. Director – Government Affairs
kevin.kastor@consolidated.com
Tel: (936) 788-7420

Implementation Date:

Road work along a seven-mile stretch of Highway 105 in the city of Conroe, Texas will necessitate the removal or disabling of existing copper loop plant, resulting in a “copper retirement” as defined under the Commission’s rules, 47 C.F.R. § 51.325(a)(3). The timing, therefore, is not under the control of Consolidated Communications. The Texas Department of Transportation has given Consolidated Communications a deadline of June 1, 2024, meaning that *all customers must be off the copper plant in the affected area at that time.*

Location of the Planned Network Changes:

The road work will take place along a seven-mile section of Highway 105, between 10th Street in Conroe, Texas, on the west and Hwy 1484 in Cut and Shoot, Texas, on the east, causing the loss of copper loop facilities to approximately 960 customer locations served by Consolidated Communications. Consolidated Communications already serves all customer locations in the affected area by fiber. Approximately 108 locations, including both residential and business customers, currently have legacy voice and/or digital subscriber line/data service provided over the existing copper plant, distributed as follows:

Affected Service over Copper Loops	Voice Only	DSL/Data Only	Voice and DSL/Data
Residential Subscribers	10	9	24
Business Subscribers	24	31	10

The above figures are approximate, to the extent that current customers may modify or terminate their services at any time. A map of the affected area and list of addresses is attached to this filing.

Description of the Planned Changes:

Approximately 37,000 feet of Consolidated Communications' underground copper loop plant must be removed along the affected route. Consolidated Communications has deployed fiber optic facilities that enable higher speed broadband services to all addresses in this area. It is not feasible at this point to install the cabinet nodes and optical-electrical network equipment that would be necessary in order to continue using the remaining portion of the old copper loops. Rather, Consolidated Communications is working to accelerate deployment of its fiber-to-the-premises facilities, prioritizing existing customers that have active voice or digital subscriber line services delivered using the copper facilities that must be removed.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

Consolidated Communications is working to ensure that the change does not result in the loss or interruption of service to any affected customer. As a result of the change, Consolidated Communications will convert its affected retail customers from copper to fiber-based services. Consolidated Communications will offer these customers a VoIP service, both as part of broadband service package with higher speeds than are available today, and on a standalone basis.

In addition, mobile voice and broadband services are available throughout the affected area from multiple wireless service providers, including at a minimum from AT&T, Verizon, and T-Mobile. Finally, Altice USA, Inc., offers mobile voice and data services in the area under its Optimum brand name, both on a standalone basis and bundled with its fixed broadband fiber offerings.

Description of Steps to Minimize the Impact of the Reduced Waiting Period on Directly Interconnected Telephone Exchange Service Providers, pursuant to 47 C.F.R. § 51.333(g)(2):

As explained above, for reasons that are outside of its control, Consolidated Communications cannot comply with the 90-day notice period set forth in Section 51.333(b)(2) of the Commission's rules, 47 C.F.R. § 51.333(b)(2). Pursuant to section 51.333(g)(2) of the Commission's rules, 47 C.F.R. §51.333(g)(2), Consolidated Communications is providing notice of the network change as soon as practicable, and is entitled to a reduced waiting period commensurate with the circumstances at issue.

Consolidated Communications does not anticipate that this work will impact any competing service provider's performance or ability to provide service, nor its interoperability with other service providers. No CLEC purchases unbundled copper loops or other wholesale services that will be affected by this work. Moreover, before filing this notice, Consolidated Communications determined that there are no other telephone exchange service providers that directly interconnect with its network in the area.

Consolidated Communications will, of course, work collaboratively to address any concerns that may arise.
