

Definitions:	
Fixed Broadband	Fixed broadband service refers to any type of broadband service that terminates at a specific end-user premises. This includes the provision of a broadband wireless channel to the end-user premises over licensed or unlicensed spectrum.
Mobile Broadband	Mobile broadband service refers to a service that allows end users to receive information from and/or send information to the Internet from a mobile device and using a mobile network. A mobile network enables providers to reuse frequencies and accomplish seamless handoff of subscriber data
Legacy	The term "legacy" refers to an internet service offering in which an ACP subscriber is enrolled that a participating provider is not accepting new enrollment.
Base Monthly Price	"Base monthly price" means the monthly price for a broadband internet service offering that would be paid by a household enrolled in the Affordable Connectivity Program, absent the affordable connectivity benefit. The base monthly price does not include the price of any recurring monthly fees (such as fees providers impose at their discretion, or equipment rental fees), government taxes or fees, or one-time charges (such as installation charges, equipment purchase fee, etc.). Base monthly prices are weighted by the number of subscribers on each plan in each state.
Maximum or Minimum Advertised Download Speed	The term "advertised speed" means the maximum advertised upload and download speeds for fixed broadband plans, and the minimum advertised upload and download speeds for mobile broadband
Notes:	<p>* indicates data that have been redacted to prevent potential disclosure of subscribers' personally identifiable information and/or provider-specific information.</p> <p>Subscribers on plans that provided both fixed and mobile broadband service are included in the fixed broadband totals and account for approximately 235,000 subscribers. A de minimus number of non-legacy fixed and mobile subscribers for which no speed was reported are included in the lowest speed tiers of the corresponding non-legacy broadband type. FCC staff excluded approximately outlier 5,000 households where prices appeared over \$5,000/mo or speeds of over 10,000 mbps.</p> <p>TDC subscriber and plan data submitted as of 8/1/2023 with revisions through 5/8/2024. Filers were required to submit data by 11/30/2023.</p>
