I support the process to right-size our data collections and appreciate the comprehensive approach we are taking. I also support the specific decision to review the narrowband *Computer III* CEI and ONA requirements. This is an overdue and welcome step forward. I hope we use the same standard – whether the Commission relies on a submission in the course of its normal decision-making – to make more proposals to eliminate or scale back other outdated data submissions.

The Commission also proposes to potentially expand its data requirements associated with our broadband deployment reporting. I welcome all efforts to ensure that we have reliable and accurate data to inform our decision-making. In a number of places, the *Notice* proposes increases—potentially significant ones—in the type and scope of data gathering required. In the spirit of the broader data initiative, I believe the Commission should act judiciously and answer a few threshold questions before expanding any of our data collection obligations: What is the nexus between the data to be requested and our statutory responsibilities? Is this new data integral to fulfilling a statutory responsibility? Is the data gathering the best and least burdensome means to acquire the data?

I appreciate that many of these questions are explicitly raised in the *Notice*, and welcome the Chairman’s recognition of the heavy burden well-intentioned data requests may have on industry. I will be watching this proceeding closely with particular attention on proposals surrounding broadband pricing and customer satisfaction metrics. Thank you.
