REPORT AND ORDER

Adopted: May 3, 2011

Released: May 4, 2011

By the Commission:

I. INTRODUCTION

1. This Report and Order extends until June 30, 2012 the existing freeze of the Federal Communications Commission’s rules regarding jurisdictional separations. Specifically, the Commission extends the existing freeze of Part 36 category relationships and jurisdictional cost allocation factors.¹ Telephone companies typically use the same network facilities to provide both intrastate and interstate services. Jurisdictional separations is a system of rules for allocating common network costs into interstate and intrastate jurisdictions. The allocation of common costs can affect regulated interstate and intrastate rates. The Commission froze aspects of the jurisdictional separations rules in 2001 and has periodically extended the freeze since then. The Federal-State Joint Board on Separations has been working on a recommendation for reform of the jurisdictional separations process and has dedicated significant resources to that effort, particularly during the past year. However, the issues at stake are quite complex, and they will be affected by—and may affect—other reform efforts, such as universal service and intercarrier compensation, that are underway. Extending the freeze will provide stability for carriers that must comply with the Commission’s separations rules while the Joint Board completes its analysis of, and recommendations for, interim and comprehensive reform of the jurisdictional separations process.

II. BACKGROUND

2. Jurisdictional separations is the process by which incumbent local exchange carriers (LECs) apportion regulated costs between the intrastate and interstate jurisdictions. Historically, one of the primary purposes of the separations process has been to prevent incumbent LECs from recovering the same costs in both the interstate and intrastate jurisdictions.²

¹ See *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Order and Further Notice of Proposed Rulemaking, 21 FCC Rcd 5516, 5517, 5523, paras. 1, 16 (2006) (*2006 Separations Freeze Extension and Further Notice*) (extending for three years the initial separations freeze, which was scheduled to expire June 30, 2006); *Jurisdictional Separations and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 24 FCC Rcd 6162 (2009) (*2009 Separations Freeze Extension Order*) (extending the separations freeze until June 30, 2010); *Jurisdictional Separations and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 25 FCC Rcd 6046 (2010) (*2010 Separations Freeze Extension Order*) (extending the separations freeze until June 30, 2011); 47 C.F.R. Part 36.

² As the Supreme Court has recognized, procedures for the separation of intrastate and interstate property and expenses have been necessary for the appropriate recognition of authority between the interstate and intrastate jurisdictions. *Smith v. Illinois Bell Tel. Co.*, 282 U.S. 133, 148 (1930) (*Smith v. Illinois*). The Supreme Court added that “[w]hile the difficulty in making an exact apportionment of the property is apparent, and extreme nicety is not required, only reasonable measures being essential, it is quite another matter to ignore altogether the actual uses to which the property is put.” *Id.* at 150–51 (citations omitted); see also *MCI Telecommunications Corp. v. 3. Incumbent LECs first separate costs into regulated and unregulated categories.³ Incumbent LECs then perform jurisdictional separations by apportioning the regulated costs in each category between the intrastate and interstate jurisdictions in accordance with the Commission's Part 36 separations rules.⁴ After the costs are jurisdictionally separated, incumbent LECs apportion the interstate regulated costs among the interexchange services and rate elements that form the cost basis for the incumbent LECs' interstate access tariffs.⁵ Incumbent LECs perform this interstate costs apportionment in accordance with Part 69 of the Commission's rules.⁶ The costs allocated to the intrastate jurisdiction form the foundation for determining incumbent LECs' intrastate rate base, expenses, and taxes.

4. The jurisdictional separations process has two parts. First, incumbent LECs assign regulated costs to various categories of plant and expenses. In certain instances, costs are further disaggregated among service categories.⁷ Second, the costs in each category are apportioned between the intrastate and interstate jurisdictions. These jurisdictional apportionments of categorized costs are based upon either a relative use factor, a fixed allocator, or, when specifically allowed in the Part 36 rules, by direct assignment.⁸ For example, loop costs are allocated by a fixed allocator, which allocates 25 percent of the loop costs to the interstate jurisdiction and 75 percent of the costs to the intrastate jurisdiction.⁹

5. The Commission undertakes rulemakings regarding jurisdictional separations in consultation with the Federal-State Joint Board on Jurisdictional Separations (Joint Board).¹⁰ In 1997, the Commission initiated a proceeding seeking comment on the extent to which legislative, technological, and market changes warranted comprehensive reform of the separations process.¹¹ The Commission

³ 47 C.F.R. §§ 64.901–904. Non-regulated activities generally consist of activities that have never been subject to regulation under Title II of the Communications Act of 1934, as amended; activities formerly subject to Title II regulation that the Commission has preemptively deregulated; and activities formerly subject to Title II regulation that have been deregulated at the interstate level, but not preemptively deregulated at the intrastate level, which the Commission decides should be classified as non-regulated activities for Title II accounting purposes. See 47 C.F.R. § 32.23(a); *Accounting Safeguards under the Telecommunications Act of 1996*, CC Docket No. 96-150, Report and Order, 11 FCC Rcd 17539, 17573 (1996) (subsequent history omitted).

⁴ 47 C.F.R. Part 36.

⁵ Part 61 of the Commission's rules prescribes the procedures for filing and updating interstate tariffs. See 47 C.F.R. Part 61.

⁶ 47 C.F.R. Part 69.

⁷ For example, central office equipment (COE) Category 1 is Operator Systems Equipment, Account 2220. The Operator Systems Equipment account is further disaggregated or classified according to the following arrangements: (i) separate toll boards; (ii) separate local manual boards; (iii) combined local manual boards; (iv) combined toll and DSA boards; (v) separate DSA and DSB boards; (vi) service observing boards; (vii) auxiliary service boards; and (viii) traffic service positions. See 47 C.F.R. § 36.123.

⁸ Because some costs are directly assigned to a jurisdictionally pure service category, i.e., a category used exclusively for either intrastate or interstate communications, both steps are often effectively performed simultaneously. For example, the cost of private line service that is wholly intrastate in nature is assigned directly to the intrastate jurisdiction. See 47 C.F.R. § 36.154(a).

noted that the current network infrastructure is vastly different from the network and services used to define the cost categories appearing in the Commission's Part 36 rules.¹² The Commission also invited the State Members of the Joint Board to develop a report that would identify additional issues that the Commission should address in its comprehensive separations reform effort.¹³ The State Members filed a report setting forth additional issues that they believe should be addressed by the Joint Board and proposing an interim freeze, among other things, to reduce the impact of changes in telephone usage patterns and resulting cost shifts from year to year.¹⁴

6. On July 21, 2000, the Joint Board issued its *2000 Separations Recommended Decision*, recommending that, until comprehensive reform can be achieved, the Commission (i) freeze Part 36 category relationships and jurisdictional allocation factors for incumbent LECs subject to price cap regulation (price cap carriers) and (ii) freeze allocation factors only for incumbent LECs subject to rate-of-return regulation (rate-of-return carriers).¹⁵ In the *2001 Separations Freeze Order*, the Commission generally adopted the Joint Board's recommendation.¹⁶ The Commission concluded that the freeze would provide stability and regulatory certainty for incumbent LECs by minimizing any impacts not contemplated by the Commission's Part 36 rules, such as growth in local competition and new technologies.¹⁷ Further, the Commission found that a freeze of the separations process would reduce regulatory burdens on incumbent LECs during the transition from a regulated monopoly to a deregulated, competitive environment in the local telecommunications marketplace.¹⁸ Under the freeze, price cap carriers calculate: (1) the relationships between categories of investment and expenses within Part 32 accounts; and (2) the jurisdictional allocation factors, as of a specific point in time, and then lock or

See *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Public Notice, 15 FCC Rcd 15054 (Common Carr. Bur. 2000) (*2000 Separations Public Notice*). Part 32 contains the Uniform System of Accounts for Telecommunications Companies. It specifies the accounts that incumbent LECs must use to record their costs. See 47 C.F.R. Part 32. "Category relationships" are the percentage relationships of each Part 36 category to the total amount recorded in its corresponding Part 32 account(s). See 47 C.F.R. Parts 32, 36. "Jurisdictional allocation factors" are the percentage relationships that allocate costs assigned to Part 32 accounts for jointly used plant between the interstate (federal) and intrastate (state) jurisdictions. See *2000 Separations Recommended Decision*, 15 FCC Rcd at 13172, para. 20.

¹⁶ *2001 Separations Freeze Order*, 16 FCC Rcd at 11387–88, para. 9.

¹⁷ *Id.* at 11389–90, para. 12. Jurisdictional cost shifts in separations results generally are caused by changes in any of three areas: overall cost levels, categorization of costs (i.e., relative category assignments), or jurisdictional allocation factors. A carrier's increased overall cost level in a Part 32 account that has a high cost allocation to the interstate jurisdiction will cause shifts to the interstate jurisdiction for other investment and expense accounts whose jurisdictional allocations are dependent on that account. Increasing investment in specific categories (e.g., interexchange cable and wire facilities) may also contribute to jurisdictional shifts in the final results. Likewise, changes in customer calling patterns (e.g., increased interstate calling) will cause shifts in the jurisdictional allocation factors, many of which are based on usage. These factors allocate a significant portion of a carrier's investment between the interstate and intrastate jurisdictions.

¹⁸ Although incumbent LECs were required under the Part 36 rules to perform separations studies, competitive carriers had no similar requirements. The Commission found that a freeze would further the Commission's goal of achieving greater competitive neutrality during the transition to a competitive marketplace by simplifying the separations process for those carriers subject to Part 36. *Id.* at 11390, para. 13.

“freeze” those category relationships and allocation factors in place for a set period of time. The carriers use the “frozen” category relationships and allocation factors for their calculations of separations results and therefore are not required to conduct separations studies for the duration of the freeze. Rate-of-return carriers are only required to freeze their allocation factors, but were given the option of also freezing their category relationships at the outset of the freeze.¹⁹

7. The Commission ordered that the freeze would be in effect for a five-year period beginning July 1, 2001, or until the Commission completed comprehensive separations reform, whichever came first.²⁰ In addition, the Commission stated that, prior to the expiration of the separations freeze, the Commission would, in consultation with the Joint Board, determine whether the freeze period should be extended.²¹ The Commission further stated that any decision to extend the freeze beyond the five-year period in the *2001 Separations Freeze Order* would be based “upon whether, and to what extent, comprehensive reform of separations has been undertaken by that time.”²²

8. On May 16, 2006, in the *2006 Separations Freeze Extension and Further Notice*, the Commission extended the freeze for three years or until comprehensive reform could be completed, whichever came first.²³ The Commission concluded that extending the freeze would provide stability to incumbent LECs that must comply with the Commission’s jurisdictional separations rules pending further Commission action to reform the Part 36 rules, and that more time was needed to study comprehensive reform.²⁴ The freeze was subsequently extended by one year in 2009²⁵ and again in 2010.²⁶

9. When it extended the freeze in 2009, the Commission referred a number of issues to the Joint Board and asked the Joint Board to prepare a recommended decision. The Commission stated that it was “committed to working with the Joint Board to develop an efficient system for the jurisdictional separation of regulated costs in light of the dynamic nature of the telecommunications market place and the dramatic changes to the telecommunications industry since the separations freeze was first adopted in

2001.²⁷ The Commission asked the Joint Board to consider comprehensive jurisdictional separations reform, as well as an interim adjustment of the current jurisdictional separations freeze, and whether, how, and when the Commission's jurisdictional separations rules should be modified.²⁸

10. On March 1, 2011, the Commission sought comment on extending the freeze once more.²⁹

III. EXTENSION OF THE FREEZE

11. We extend until June 30, 2012, the freeze on Part 36 category relationships and jurisdictional cost allocation factors that the Commission adopted in the *2001 Separations Freeze Order*. As a result, price cap carriers will use the same relationships between categories of investment and expenses within Part 32 accounts and the same jurisdictional allocation factors that have been in place since the inception of the current freeze on July 1, 2001; rate-of-return carriers will use the same frozen jurisdictional allocation factors, and will use the same frozen category relationships if they had opted previously to freeze those.

12. We conclude that extending the freeze will provide stability to carriers that must comply with the Commission's jurisdictional separations rules while the Commission and the Joint Board undertake reform of those rules. The Joint Board supports this one-year extension of the freeze,³⁰ and the majority of commenters support extension of the freeze for one year or longer.³¹

13. The Joint Board has been working intensively to address issues related to interim and comprehensive reform of the jurisdictional separations process. For example, the Joint Board staff has conducted an extensive analysis of various approaches to separations reform, and the Joint Board is evaluating that analysis. Although the Joint Board is making progress toward a recommended decision, that work is ongoing. The issues facing the Joint Board are broad and complex. In addition, the Commission recently adopted an NPRM proposing to reform universal service and intercarrier compensation.³² The Joint Board may take those reform efforts into consideration as it further evaluates separations reform.³³ In the meantime, we agree with commenters that assert that continuing the freeze for one more year will minimize unnecessary costs and disruption.

14. Eliminating the freeze would create undue instability and administrative burdens while the Commission is considering comprehensive separations reform.³⁴ If the Commission allowed the earlier separations rules to return to force, carriers would be required to reinstitute their separations

processes even though many carriers no longer have the necessary employees and systems in place to comply with the old jurisdictional separations process and likely would have to hire or reassign and train employees and redevelop systems for collecting and analyzing the data necessary to perform separations.³⁵ The Commission has referred to the Joint Board comprehensive separations reform, and depending upon the Joint Board's recommendations and reforms ultimately adopted by the Commission, comprehensive reform could render the pre-freeze separations rules obsolete.³⁶ To require carriers to reinstitute their separations systems "would be unduly burdensome when there is a significant likelihood that there would be no lasting benefit to doing so."³⁷

15. Some commenters have recommended that the Commission consider extending the freeze for longer than one year,³⁸ maintain the freeze until the Commission has completed universal service and intercarrier compensation reform,³⁹ allow modification of frozen category relationships for rate-of-return carriers,⁴⁰ or make other modifications to the separations process.⁴¹ Each of these issues falls within the referral to the Joint Board in the *2009 Separations Freeze Extension Order* and may be addressed in the Joint Board's recommended decision.⁴² We therefore decline to address them in this order.

IV. PROCEDURAL MATTERS

16. *Final Regulatory Flexibility Certification.* The Regulatory Flexibility Act of 1980, as amended (RFA),⁴³ requires that a regulatory flexibility analysis be prepared for notice-and-comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities."⁴⁴ The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."⁴⁵ In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act.⁴⁶ A "small business concern" is one that: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).⁴⁷

⁴³ See 5 U.S.C. § 604. The RFA, see 5 U.S.C. §§ 601–612, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996).

⁴⁴ 5 U.S.C. § 605(b).

⁴⁵ 5 U.S.C. § 601(6).

⁴⁶ 5 U.S.C. § 601(3) (incorporating by reference the definition of "small business concern" in the Small Business Act, 15 U.S.C. § 632). Pursuant to 5 U.S.C. § 601(3), the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the Federal Register."

⁴⁷ 15 U.S.C. § 632.

17. As discussed above, in 2001 the Commission adopted a Joint Board recommendation to impose an interim freeze of the Part 36 category relationships and jurisdictional cost allocation factors, pending comprehensive reform of the Part 36 separations rules.⁴⁸ The Commission ordered that the freeze would be in effect for a five-year period beginning July 1, 2001, or until the Commission completed comprehensive separations reform, whichever came first.⁴⁹ On May 16, 2006, concluding that more time was needed to implement comprehensive separations reform, the Commission extended the freeze for three years or until such comprehensive reform could be completed, whichever came first.⁵⁰ On May 15, 2009, the Commission extended the freeze until June 30, 2010,⁵¹ and on May 24, 2010, the Commission extended the freeze until June 30, 2010.⁵²

18. The purpose of the current extension of the freeze is to allow the Commission and the Joint Board additional time to consider changes that may need to be made to the separations process in light of changes in the law, technology, and market structure of the telecommunications industry without creating the undue instability and administrative burdens that would occur were the Commission to eliminate the freeze.⁵³

19. Implementation of the freeze extension will ease the administrative burden of regulatory compliance for LECs, including small incumbent LECs. The freeze has eliminated the need for all incumbent LECs, including incumbent LECs with 1500 employees or fewer, to complete certain annual studies formerly required by the Commission's rules. The effect of the freeze extension is to reduce a regulatory compliance burden for small incumbent LECs, by abating the aforementioned separations studies and providing these carriers with greater regulatory certainty. Therefore, we certify that the requirement of the report and order will not have a significant economic impact on a substantial number of small entities.

20. The Commission will send a copy of the report and order, including a copy of this Final Regulatory Flexibility Certification, in a report to Congress pursuant to the Congressional Review Act.⁵⁴ In addition, the report and order and this final certification will be sent to the Chief Counsel for Advocacy of the SBA, and will be published in the Federal Register.⁵⁵

21. *Paperwork Reduction Act Analysis.* This report and order does not contain new, modified, or proposed information collections subject to the Paperwork Reduction Act of 1995.⁵⁶ In addition, therefore, it does not contain any new, modified, or proposed "information collection burden for small business concerns with fewer than 25 employees" pursuant to the Small Business Paperwork Relief Act of 2002.⁵⁷
